

International Framework for Nuclear Energy Cooperation

Reliable Nuclear Fuel Services Working Group Co-Chair

Mr. Sean TYSON

Office of International Nuclear Energy Policy and Cooperation

Office of Nuclear Energy

U.S. Department of Energy

Sean Tyson graduated in 1992 from the Monterey Institute of International Studies with a Master's degree in International Policy Studies, with an emphasis on arms control and nonproliferation. He has since served with the United States Department of Energy in a variety of international programs focused on international cooperation on nonproliferation.

In the late 90s, Mr. Tyson provided direct oversight of the cleaning, conditioning and storage activities in Nyongbyon, North Korea under the U.S.-North Korea Agreed Framework. He then transitioned to the U.S.-Russia Materials Protection, Control and Accounting program, where he managed activities focused on increasing nuclear materials security at nuclear facilities in Russia.

Most recently, Mr. Tyson has supported the Office of Nuclear Energy bilateral and multilateral exploration of multinational options for the disposal of spent nuclear fuel and high level radioactive waste.
