

International Framework for Nuclear Energy Cooperation

Steering Group Vice-chair

Mr. Shi Lishan

Deputy Director General
Nuclear Power Department
National Energy Administration
People's Republic of China

Mr Shi Lishan, is currently the Deputy Director-General of the Nuclear Power Department of the National Energy Administration of China. He is mainly engaged in nuclear energy international cooperation and NPP construction operation management activities.

He was previously involved in the management of renewable energy and clean energy industries: the establishment of the renewable energy industry system in China, the development of renewable energy and clean energy industries, international cooperation and the nation's energy transformation strategy.

He has organized and presided over the formulation and management of a number of China's hydropower, wind power and nuclear power industrial policies and development strategies.
